# ATTENTION CUSTOMERS!!!

August 4, 2017

Dear Valued Customer:

Over the past month we have gotten a series of notices from Xcel Energy that numerous pressurized tanks containing hazardous material have been discovered in loads brought into their facility by our trucks. These tanks have been found in several different loads so we know they are coming from multiple different customers. The tanks that have been discovered look similar to a propane tank but have contained several different chemical compounds. These pressurized tanks contain harmful gasses, liquids, and contaminates and if set off pose a very high safety risk to anyone near them. Xcel Energy and the La Crosse County Landfill have contacted us about the harmful nature of these tanks and have mentioned getting the DNR involved as well, which could lead to potentially large fines for improper disposal of hazardous/harmful material. We need your help in eliminating these tanks from the waste stream. Any tanks, such as propane tanks or tanks with any type of liquid or gel chemicals still in them, etc. CANNOT be disposed of in your refuse container. Most containers, if empty, can be recycled. If you have any pressurized tanks or tanks still containing other hazardous material please contact the La Crosse County Household Hazardous Material site at 608-785-9999 for instructions on how to properly dispose of them. Thank you for being a valued customer of Harter's and helping us to resolve this matter and keep everyone safe.

Sincerely,

Harter's Quick Clean-Up
You friendly neighborhood trash hauler
