

### **What is the City's Ordinance regarding lawn length?**

The City requires that lawns, grasses, and noxious weeds on lots, and parcels of land be kept trimmed below 8 inches in length as per Section 8-1-7 of the City's Code of Ordinances. It is important to control weed growth and grass length to protect the adjacent established lawns, reduce fire hazards, and decrease the amount of pollen emitted. The City enforces this by mailing a notice to property owners who not in compliance. If the area is not mowed after two notices have been sent, the City will hire a private contractor to mow and bill the property owner.
